

- Synaptic vesicle cycle - Mus musculus (house mouse)
- cell projection morphogenesis
- Trafficking of AMPA receptors
- modulation of chemical synaptic transmission
- Insulin secretion - Mus musculus (house mouse)
- Long-term depression - Mus musculus (house mouse)
- synaptic signaling
- membrane organization
- ligand-gated ion channel signaling pathway
- Axon guidance
- cellular homeostasis
- Carbon metabolism - Mus musculus (house mouse)
- regulation of plasma membrane bounded cell project
- Cellular responses to stimuli
- regulation of receptor-mediated endocytosis
- dendritic spine development
- Pathways of neurodegeneration - multiple diseases -
- mitochondrial transport
- regulation of synapse structure or activity
- cognition
